In 1858, John Hanning Speke came upon Lake Victoria (as he named it) and realised he had found the source of the Nile. He had struggled through east Africa for two years, going both temporarily blind and deaf.

By comparison, my arrival at the source of the Ouse in deepest West Sussex was a rather more low-key affair. A bus driver dropped me off near a road junction south-east of Horsham called Ashfold Crossways. In a small private wood nearby, the Ouse rises up. I duly peered through the trees towards the spot indicated as the source on my map, popped across the road to The Wheatsheaf pub to toast the fledgling river's health, and started out on my adventure.

Admittedly, I had a little help with orientation. The 42-mile Sussex Ouse Valley Way (so called to distinguish it from Britain's

other Ouses) opened in 2006, the brainchild of slow-travel enthusiasts Terry Owen and Peter Anderson. They've done a fine job too, for the route rarely strays long from the river.

LIFE-GIVING JOURNEY

While the Ouse is still little more than a maddy trickle, it passes Slougham. There I had a duty to perform a long overdue visit to my grandparents' graves at St Mary's, the tiny village's surprisingly large Norman church. I was as pleased as they would have been to find the rambling graveyard liberally speckled with spotted orchids and the cheery chalk-blossoms of speedwell.

With my head full of wise, sobering and highly unoriginal reflections on the river as a metaphor for the journey of life, I pressed on eastwards. The Ouse begins its journey in the western corner of the High Weald Area of
