COLLECTION NETTOYONS LA NATURE E.LECLERC

SUR LA PLAGE À BOULOGNE ÉDOUARD MANET

Au-delà de la nuisance visuelle entraînée par l'abandon des déchets sur les plages, ces derniers détruisent la faune et la flore des lieux. Dans le monde, 20 milliards de tonnes de déchets sont déversés directement dans les océans chaque année. Ensemble, rendons à la nature sa beauté originelle. Nettoyer la nature, c'est dans notre culture depuis 20 ans.

Œuvre inspirée du tableau *Sur la plage à Boulogne* d'Édouard Manet (1872).

COLLECTION NETTOYONS LA NATURE E.LECLERC

LES BAIGNEURS FRÉDÉRIC BAZILLE

Un litre d'huile usagée déversée dans un lac ou une rivière peut couvrir 1000 m² d'eau et empêcher l'oxygénation de la faune et de la flore pendant des années. Les plantes deviennent moins résistantes et la reproduction des poissons et des coquillages est totalement perturbée. Ensemble, rendons à la nature sa beauté originelle. Nettoyer la nature, c'est dans notre culture depuis 20 ans.

Œuvre inspirée du tableau *Les Baigneurs* de Frédéric Bazille (1869).
